Sounds good. No additional information required. Have a great Thanksgiving.

Jared Blumenfeld

Hi Jared,

I just want to give you a heads up that The Navy will host a routine Community Meeting on December 3, at 6 pm, at the Southeast Community College, to give an update on site cleanup. Featured topics will be the Parcel E Treatability Study and Parcel C Remedial Action. Due to community interest, the Navy also plans a separate meeting in early 2015 to focus specifically on cleanup of radioactive materials.

Separately, EPA hosted a community meeting on November 17, 2014, to seek community input on technical assistance needs. Our meeting went really well. Participants voted the following subjects as top priorities: the durability of the Parcel E-2 landfill remedy in case of earthquakes or sea level rise, radiation sampling inconsistency, air quality and health impacts, and upcoming transfers of parcels for redevelopment.

The San Francisco Office of Community Investment and Infrastructure (OCII) will host five public meetings regarding the plans for transfer of Parcels D-2, G, UC-1, and UC-2 for redevelopment. OCII is tentatively planning these meetings for January through March, 2015. EPA is following up on community requests for technical assistance on this and the other priority technical assistance needs identified through the community process.

We plan to provide you an update briefing in the near future (Dec/Jan pending on your availability). Let me know if you have any questions. Angeles
